Aparna NS

Junior Software Engineer | Full Stack Developer

Email: writetoaparnans@gmail.com | **Phone:** +91 79023 39267 | **Location:** Kochi, Kerala, India
LinkedIn: linkedin.com/in/aparna-ns-0b698333b | **GitHub:** github.com/Aparna-ns | **Portfolio:** aparna-react-portfolio.netlify.app

PROFESSIONAL SUMMARY

Full Stack Software Developer experienced in Python, Django, React, REST APIs, databases, and document automation. Current Junior Software Engineer at Kompetenzen Technologies with practical expertise in end-to-end web engineering, OCR text extraction (Tesseract), programmatic PDF processing (PyMuPDF), relational schema design (PostgreSQL), and cloud deployment (Docker & Render). Strong technical background including Python & SQL training mentorship.

TECHNICAL SKILLS

Backend:	Python, Django, Django REST Framework, RESTful API Development
Frontend:	React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap
Databases:	PostgreSQL, SQL, MySQL, Schema Modeling, ORM Querying
AI & Document:	Tesseract OCR, PyMuPDF, Document Text Extraction, PDF Splitting & Automation
Tools & Cloud:	Docker, Render, Netlify, Git, GitHub, Postman, Linux basics

PROFESSIONAL EXPERIENCE

Junior Software Engineer — Kompetenzen Technologies | *Kochi, Kerala (Present)*

- Develop and maintain backend services and RESTful APIs using Python and Django Framework.
- Collaborate on frontend features using React.js and modern JavaScript for intuitive user workflows.
- Design, query, and optimize relational database models using PostgreSQL.
- Build document processing pipelines, automated file extraction, and handle cloud deployments.
- Work with team version control workflows in Git and GitHub.

TEACHING & KNOWLEDGE SHARING

Python & SQL Trainer / Mentor — Techolas Technologies | *Kochi, Kerala (05/2024 – 01/2025)*

- Conducted practical training sessions on Python programming, OOP principles, and SQL database querying.
- Guided learners through full-stack web development fundamentals including Django architecture and React.
- Mentored students in debugging, practical coding exercises, and real-world project problem solving.

REAL-WORLD PROJECTS

Document Process Manager (Primary Featured Project)

Tech Stack: React.js, Bootstrap, Django REST Framework, Python, PostgreSQL, Tesseract OCR, PyMuPDF, Docker, Render

- Full-stack web application automating extraction, splitting, and storage of combined multi-page scanned PDFs.
- Integrated Tesseract OCR to scan cover pages and automatically recognize document reference numbers.
- Programmatically split PDF bundles into standalone documents using PyMuPDF and stored metadata in PostgreSQL.
- Containerized with Docker and deployed to Render with automated GitHub deployment workflow.
- **Live Demo:** document-processing-sysytem.onrender.com | **GitHub:** github.com/Aparna-ns/document_processing_sysytem

Django Full-Stack E-Commerce Web Application

Tech Stack: Python, Django, PostgreSQL, JavaScript, HTML5/CSS3

- Built an end-to-end shopping application with user authentication, catalog browsing, cart operations, and checkout.
- Engineered dynamic filtering, cart price calculations, and admin oversight via Django Administration.
- **GitHub:** github.com/Aparna-ns/ecommerce

EDUCATION & CERTIFICATIONS

- **AI Training Program & Best Award** — Techolas Technologies Pvt. Ltd., Kochi
- **Fullstack Python Django Development** — Focus Technolab, Kochi (Completed 07/2025)
- **B.Tech in Electronics & Communication** — Mahatma Gandhi University, Kottayam (2014 – 2018)
